

TAMPA BAY WATER PUMP STATION EXPANSION
ENVIRONMENTAL PERMITTING ASSISTANCE
Pasco and Hillsborough Counties, Florida

DESCRIPTION OF PROJECT

This Tampa Bay Water project involved infrastructure expansion at three existing facilities in both Hillsborough and Pasco Counties. Scheda scientists provided ecological support to MWH Americas, Inc. as part of the expansion permitting. Project responsibilities included completion of wetland delineations, conducting listed species surveys of all three sites, and compiling the resulting data to create environmental support documents for ERP permit applications to the Southwest Florida Water Management District and U.S. Army Corps of Engineers.
